Export to a text file - "Save As" function

You can export the content of your Clipboard Journal or of your Note Jotter to a text file (.txt).

Open the Tab whose content you wish to export and click on the "Save As Button. The "Save As" dialog Box will open to give you the option to choose under which name and where to export the file.

By defaults your files are saved as "kornitop-journal-200x-xx-xx.txt"

Kornitop can only export to a text file.
