
Introducing Kornitop

Posted by Paula - 2007/04/04 23:47

Kornitop a new Clipboard Utility - Clipboard application

Kornitop is an on board journal, clipboard manager and all round command bridge for you desktop needs.

Download "kornitop 0.6.6.3"

The Kornitop application has a simple but powerful tab based user interface that allows you to easily visualize and use its functionalities.

Each tab offers a different function so all your information is always only a click away.

Here are some key features of "Kornitop":

- Keep track of your work and reuse with ease fragments of text, saved url's or file paths with Clipboard Journal.
- Find any content saved in Kornitop with the Find function.
- Keep notes and reminders easily with Note Jotter.
- Keeps and save the last image copied to the clipboard with Clipboard Images.
- Save views of the folders you have been working in using the Drop Zone.
- Know what is running on your machine with Applications.

A bit of history

Kornitop, our favorite work companion!

Pieter Greyling first created Kornitop as a personal scratch pad and clipboard recorder in order to keep track of his work and avoid having to copy strings over and over again. It soon became indispensable and Pieter decided to add a few other useful functionalities.

Paula Greyling who is a technical translator and webmaster for ChileServe, also spends a lot of time reusing text strings, for jobs in which CAT tools cannot be used. She tried it and became quickly addicted to its ease of use and practicality.

We offer it for free, download it, use it and if you wish to feedback; we would very much appreciate it.

You can download the setup program, it installs without problems as far as we know and it contains a small help file (it's a bit out of date but I haven't had time to work on it) to get you started.
